# Osrs hellhounds slayer guide

Osrs should i skip hellhounds. Osrs best slayer master for hellhounds. Osrs best place to kill hellhounds. Osrs best way to kill hellhounds.

The best thing about this place is that you can cannon them here. Even if you are not going to use melee prayer, it is useful to have them increase your bonuses. It does cost a lot of valuable shards to use, so I would not recommend you use it and just use the rapier or whip. **Further Read:** The other option, the one I prefer, is using your protect from melee and killing them in multi-combat. **A** The best way to do this is in the Catacombs of Kourend. You can also use the barrows gloves here without any issue. They are worth about 500 to 600 coins per kill on average. However, they still are almost completely useless if you want to make money with the drops. You have a huge chance of getting a scroll in under 10 minutes, killing these monsters. **A** If you want to get exp, the hellhounds are pretty decent monsters. At the lower levels of strength and attack, its DPS is even higher than the rapier. This counts as a hellhound and is a great option if you want to kill something else besides the regular hellhounds you normally fight in osrs. If you do go against my advice and use an armadyr crossbow here, then the twisted buckler should be the shield of your choice. They definitely can not be killed easily if you are a low level not using a protection prayer. These keys can give you up to 500k in loot at once if you are a bit lucky. **A** Strategies for killing Hellhounds Major update! Hellhounds now count as a demonic creature. They are worth around 425 coins depending on the market prices. If you have one, you should go to either one of those two places. If you do not have one, an amulet of glory or fury will work here too. **A** Cape slot **eAAA** The best cape you can bring here is the infernal cape. You should not forget to bring an anti-poison potion here, as you can get poisoned by the spiders you have to run past. **A** Wilderness Resource Area & Wilderness slayer cave **eAAA** I am just going to mention these in case you do wilderness Shield slot **eAAA** Here the avernic defender is going to be great. The godsword will heal your hit points with 50% of the damage you do on your special attack, and your prayer points with 25% of the damage you hit during your special attack. I would recommend you to just leave them on the ground, picking them up is going to be a waste of your time. **A** Smoldering stone **eAAA** Yes, the hellhounds have a 4.3 mil drop. You need to have DPS above anything else here to kill them effectively. They open the chest behind the slayer master named Konar. **A** Vile ashes **eAAA** These ashes are a pretty new drop. A little side notes: Hellhounds had an update that made most of the guides on this monster a bit outdated, so read this one for the latest info on how to kill them effectively. **A** The best places to find and kill hellhounds Stronghold Slayer Cave **eAAA** I think this is one of the best, places to kill them quickly. The main reason for me to kill them here is the fact you can get totem pieces and shards here. Those are some of the best numbers in the game. Another decent option is the regen bracelet or the combat bracelet. No, you should not try and grind for it. If you do not have these, you are going to use your blessed deAAAhide vambraces or regular vambraces. You can still use the bandos tassets if you are using prayer, as they give a (small) prayer bonus. **A** Weapon slot **eAAA** This should be the best weapon you have. If you do not have an armadyr chest plate, your second option is going to be a blessed deAAAhide body. There, you should be able to kill them pretty quickly without a cannon. If you want a more AFK experience, you should go to the catacombs of Kourend. However, if you are on a budget, a whip is also a good option to kill them. It is a pretty fun way to do a couple of kills of your slayer task and make money at the same moment by killing vetA **Aion**. **A** The other option is the hellhound boss, Cerberus. They do Like the number one monster to kill if you are an indication hunter. Killing them with the fray and the range is very easy. If you want to kill them, you should kill them in a single fight with your best armor and high healing foods. If you want to damage, the best option here will be the claws of the dragon, will hit these hellhounds very harshly. If you have an extremely tight budget, you can always use snake bones here. You also have a rather easy way to reset your agro simply running beyond the altar and return. Answer: Yes, you have two options. However, if you make the results of the rigid combat, you will only take 60kls on average. They have a very low defense, a decent quantity of hitpoint and you can often find them in multi-combat zones. Slayer points to block tasks are valuable and you can only block a limited quantity of tasks, so don't light up the decision. If you're doing high-value drops monsters, you should only block the random if you're not going to make clues. It gives a decent bonus both in attack and in defense. At a distance groove - if you use a crossbow you should have at least Rune bolts to kill them effectively. Be aware, while you can use a cannon, do it will be rather dangerous. If you use the upper soaked version, you will have a +9 bonus. It has an extraordinary distance attack bonus and adds a bit of a prayer bonus. If you do, the odds are that you will meet a task you will kill you. However, the bandos that cash also offers a little bonus to your prayer, so you can use it if you have prayer potions to burn burn. **A** "in the slot of the legs - in the leg slot, you should use Tasset Bandos for its prayer And strength bonus. If you do, you should sing and use prayer while you are in your best in slot Melee Gear. You can easily get 50 to dneruok. dneruok id ebmocataC ellen ilrediccu itservod arola ,oiccaf emoc KFA eranous ima eS eAA,ywol pxE reyalS It is accessible quite early in the game, and there are many hellhounds shades there. If you don't have an anguish amulet, a great second option is the amulet of fury. If you kill them in the desert, wearing a ring of wealth (i), the numbers are still more in your favor. The stone is also fallen from the Hellhound boss named Cerberus. Since they are in multi-combat zones, you can often use the cannon to kill them very quickly. However, if you are not, and you just want to get the clues as soon as possible, you will need to use a NettzNot FaceGuard. It is the best slot element to vary at activities. These are worth tens of millions of GPs. Here you can easily jam and keep them aggressive towards you. As a last note, be aware that there has been an update that made Hellhounds demonic creatures. The cockpice is also much cheaper than the crossbow. A budget option, which is still very good in my opinion, is the Dragon Dagger. Killing Hellhounds with Ranging You can also kill Hellhounds with too, however, you will need to use prayer or security. If you intend to use prayer, you should bring about 10 prayer potions. Food **e** **a** - "If you are using prayer, you shouldn't take it. This will waste a lot of fragments that could be used much better somewhere else. A cape of fire or an arduogee Cape 4 will be a great alternative if you use Prayer, and want to make some decent damage. "Thorax slot - If you're not fighting it with the prayer in melee enabled, so you should use a band of bandos as a chest armor. I would use at least Mihiril darts. The Defense of Hellhounds is so low, you didn't have many problems killing them with a lesser of Rada's Blessing (4) or from Another God blessing. They have a one in 95 chance of being dropped, which isn't bad at all. Moreover, you can only find these past level 20 wilderness, so it is pretty dangerous to kill these with your slayer helmet and other great gear. These work pretty well too but are an obvious drop in quality compared to the berserker ring. **A** Special attack weapon **eAAA** I think the best weapon here if you are trying to save some money or food, is the saradomin gods word. You can safely spot them behind the rocks here and use a cannon to kill them quickly. You can AFK there for a couple of minutes by using prayer. Hellhounds used to drop only regular ashes, however that has changed into this as their 100% drop. These are a lot stronger than the regular hellhounds you face in old-school Runescape. The other options you have are the ranging skill cape or avaeAAAs attractor. If you are fighting them with prayer, you should use the proselyte armor for the prayer bones. You have the odds of getting amazing drops like the primordial crystal. Luckily, you get rewarded quite well if you kill this monster. They are above level 120 combat, and they hit pretty high and accurately. This will make quite the difference in your exp an hour, so try to get one if you are going to go for a high-ranging level. **A** Your inventory when fighting hellhounds Cannon **eAAA** If you are going to a multi-combat zone where you can use cannons, you should bring one. If you are on a (very tight) budget, an amulet of glory will work too, but you will notice the difference in exp an hour. **A** Cape slot **eAAA** The best item you can wear is the avaeAAAs assembler. Then your odds of getting one are 1 in 32 and 1 in 30 if you did the hard combat achievements. **A** Brimstone keys **eAAA** These keys only drop when you get hellhounds as a slayer task from the slayer master named Konar. It is by far the best in slot for Chest to use. If you are using the fray, it brings the same quantity in potions of divine combat. To be completed, the ARCLIGHT is close enough to the DPS of a rapier. I am one of the most reliable sources of the game to get this object. The hellhounds are quite strong. Also, make sure you have a good thousand cannon balls to be able to shoot the entire journey. Potions - Are you using ranging? Fighting them with the weak defense bonuses ranging the armor has in the old Runescape school is about to end up. "Head slot - if you are on a killing task, use the killing rudder (i) as the head slot. It falls to a much higher drop rate. They fall on average once every 32 700 kills. If you are using a cockpice I suggest you use the blessing of the rada (4) here or any blessing you have. Hellhounds is worth a lot more than they had 19 years ago. You can also use a god coin if you can't afford the **e** **a** **e**
