pork and beef. Seasonings include garlic, onion, or mustard seeds are added to the meat before it is stuffed into casings and left to ferment for several days. Afterward, the pepperoni is allowed to dry for up to 20 days before being shipped. This process is essential for creating pepperoni's soft, fine-grained texture. Pepperoni Nutrition While pepperoni is delicious, it's not a healthy food. This meat is high in sodium and saturated fat and, while it does offer some protein, it doesn't offer many nutrients overall. Eating pepperoni every once in a while is fine, but it shouldn't be a diet staple. People concerned about the nutritional value of pepperoni may want to try turkey pepperoni. Although it contains more sodium than the conventional variety, turkey pepperoni has significantly less saturated fat. Whether or not turkey pepperoni is a better alternative to regular pepperoni depends upon a person's dietary needs and health condition. Canadian bacon, shredded white-meat chicken, and lean beef or pork can all be healthier alternatives. Origins of Pepperoni Pizza While you might assume pepperoni is from Italy because of its name, it comes from the United States. Like chicken Parmesan, pepperoni was created by Italian immigrants adapting their cuisine to American kitchens. While pepperoni is a variety of salami, there is no type of Italian salami like pepperoni. Pepperoni — with two p's, not three — means "large peppers" in Italian. Why the term gained a letter and now refers to a sausage in English is a mystery. The closest phrase in Italian to American pepperoni might be "salame piccante," which translates to spicy sausage. Pepperoni was first mentioned in the U.S. government Yearbook of Agriculture in 1894, although it didn't gain popularity until the mid-20th century. Pepperoni on Pizza Before pepperoni was a pizza topping, sausage, bacon, chicken, and alternative kinds of salami were the norm. The first documented instance of pepperoni on pizza wasn't until 1950 in New Haven, Connecticut. As pizza companies like Domino's and Pizza Hut first opened in the late 1950s and early 1960s, pepperoni offered the restaurant chains several advantages as a topping. Unlike chicken and other toppings at the time, pepperoni was cheap, easy to produce, and stayed fresh during transport. The saltiness of pepperoni also appealed to customers. Because of this, as pizza chains took off in popularity, so did pepperoni. Today, pepperoni pizzas make up about 50 percent of all Domino's Pizza orders. Other Ways to Eat Pepperoni While pepperoni remains most popular as a pizza topping, it can also be found in calzones, sandwiches, and microwave snacks like pizza rolls. It also goes well with baked potatoes and can be eaten by itself. By Chron Contributor Updated August 10, 2020 Introduced in Japan and increasingly popular in the West, anime describes a style of artwork with a unique aesthetic. This animation covers full-motion cartoons in television and video. The anime look defines itself not only by visual styles of on-screen characters, including movement and clothing, but also by the worlds these characters inhabit. Artists wishing to become anime animators must familiarize themselves with this unique style of cartoon as well as develop a comprehensive portfolio. Study various types and styles of anime. Each studio and artist often has a slightly different interpretation of the art, according to Massachusetts Institute of Technology. Learning the cadence and movements commonly associated with Japanese animation helps you get a feel for how you might interpret your own material. Anime is ripe with spiritualism, the concept that things end and that characters learn and make mistakes. Learning the character-focused elements of anime gives you insight into the cultural aspects of the art. Develop a comprehensive portfolio. Try to do something unique. Given the sheer numbers of series and episodes within each anime series, it's easy to look derivative. While you watch the material, look for cues that exemplify the art style while introducing your own original elements. You want your materials to stand out among other applicants when you send your portfolio to schools and businesses. Create an animation reel and post it to various social media sites. The exposure gleaned from places like YouTube, Tokyopop, Facebook and Twitter links may get your material in front of the right people. Enroll in an art school. Although you may possess enormous natural talent, using elements from formal art training brings your art to the next level. Schools in Japan, such as Kyoto Seika University, specialize in manga art, providing graduate and post-graduate courses. Western art schools like San Francisco's Academy of Art University offer associate, bachelor's and master's-level courses in art and illustration. As with any art school, a well-rounded portfolio is a must. Schools like Kyoto Seika administer manga-specific drawing and essay examinations as part of the entrance process. Craft a letter of interest and send it with your portfolio to anime studios such as Bang Zoom!, Manga Entertainment, Media Blasters and others. You might not be paid much or at all, but the experience you gather working with other anime professionals is valuable. You'll learn the business side of the anime industry as well, since many of these companies also offer digital, online and print distribution services. Create comic strips and short stories, or yomikiri. Anime is story driven, with some animated television series reaching 10,000-plus episodes. Place an emphasis on the interpersonal relationships between characters, moving slowly with the plot to flesh these out. Send these to publications like Shoujo Beat for editorial evaluation. "Anime" is simply the Japanese term for anything cartoon. This means episodes of Tom and Jerry in Japan are referred to as anime. In the West, the term is used as a broadbrush description of the typical Japanese style of animation. Much like Western animation, Japanese animation specifically targets certain demographics. For example, shoujo manga is for young girls, josei manga is for teenage girls and shounen manga is for boys ranging from around eight into their teenage years and beyond. Japanese language proficiency is essential to attend Kyoto Seika University. Application materials and exams are all administered in Japanese.
