WATER TREATMENT • WASTEWATER TREATMENT • WATER SUPPLY

CONCRETE PIPES

Concrete pipes are used in water and wastewater applications ranging from the largest mainlines to residential 4 in. (100 mm) to 36 in. (914 mm) pipes. They are used in water supply, sewer collection, stormwater, and irrigation. Concrete pipes are made in a variety of diameters and lengths. From 100 to 200 ft (30 to 60 m) long, they are available in 12, 18, 24, 30, 36, 42, 48, 54, 60, 72, 84, 96, 108, 120, 144, 168, 192, 216, 240, 270, 300, 324, 360, 408, 432, 480, 504, 540, 600, 648, 720, 792, 864, 936, 1008, 1080, 1152, 1224, 1296, 1368, 1440, 1512, 1584, 1656, 1728, 1800, 1872, 1944, 2016, 2160, 2304, 2448, 2592, 2736, 2880, 3024, 3168, 3312, 3456, 3600, 3744, 3888, 4032, 4176, 4320, 4464, 4608, 4752, 4896, 5040, 5184, 5328, 5472, 5616, 5760, 5904, 6048, 6192, 6336, 6480, 6624, 6768, 6912, 7056, 7200, 7344, 7488, 7632, 7776, 7920, 8064, 8208, 8352, 8496, 8640, 8784, 8928, 9072, 9216, 9360, 9504, 9648, 9792, 9936, 10080, 10224, 10368, 10512, 10656, 10800, 10944, 11088, 11232, 11376, 11520, 11664, 11808, 11952, 12096, 12240, 12384, 12528, 12672, 12816, 12960, 13104, 13248, 13392, 13536, 13680, 13824, 13968, 14112, 14256, 14400, 14544, 14688, 14832, 14976, 15120, 15264, 15408, 15552, 15696, 15840, 15984, 16128, 16272, 16416, 16560, 16704, 16848, 16992, 17136, 17280, 17424, 17568, 17712, 17856, 18000, 18144, 18288, 18432, 18576, 18720, 18864, 19008, 19152, 19296, 19440, 19584, 19728, 19872, 20016, 20160, 20304, 20448, 20592, 20736, 20880, 21024, 21168, 21312, 21456, 21600, 21744, 21888, 22032, 22176, 22320, 22464, 22608, 22752, 22896, 23040, 23184, 23328, 23472, 23616, 23760, 23904, 24048, 24192, 24336, 24480, 24624, 24768, 24912, 25056, 25200, 25344, 25488, 25632, 25776, 25920, 26064, 26208, 26352, 26496, 26640, 26784, 26928, 27072, 27216, 27360, 27504, 27648, 27792, 27936, 28080, 28224, 28368, 28512, 28656, 28800, 28944, 29088, 29232, 29376, 29520, 29664, 29808, 29952, 30096, 30240, 30384, 30528, 30672, 30816, 30960, 31104, 31248, 31392, 31536, 31680, 31824, 31968, 32112, 32256, 32400, 32544, 32688, 32832, 32976, 33120, 33264, 33408, 33552, 33696, 33840, 33984, 34128, 34272, 34416, 34560, 34704, 34848, 34992, 35136, 35280, 35424, 35568, 35712, 35856, 36000, 36144, 36288, 36432, 36576, 36720, 36864, 37008, 37152, 37296, 37440, 37584, 37728, 37872, 38016, 38160, 38304, 38448, 38592, 38736, 38880, 39024, 39168, 39312, 39456, 39600, 39744, 39888, 40032, 40176, 40320, 40464, 40608, 40752, 40896, 41040, 41184, 41328, 41472, 41616, 41760, 41904, 42048, 42192, 42336, 42480, 42624, 42768, 42912, 43056, 43200, 43344, 43488, 43632, 43776, 43920, 44064, 44208, 44352, 44496, 44640, 44784, 44928, 45072, 45216, 45360, 45504, 45648, 45792, 45936, 46080, 46224, 46368, 46512, 46656, 46800, 46944, 47088, 47232, 47376, 47520, 47664, 47808, 47952, 48096, 48240, 48384, 48528, 48672, 48816, 48960, 49104, 49248, 49392, 49536, 49680, 49824, 49968, 50112, 50256, 50400, 50544, 50688, 50832, 50976, 51120, 51264, 51408, 51552, 51696, 51840, 51984, 52128, 52272, 52416, 52560, 52704, 52848, 52992, 53136, 53280, 53424, 53568, 53712, 53856, 54000, 54144, 54288, 54432, 54576, 54720, 54864, 55008, 55152, 55296, 55440, 55584, 55728, 55872, 56016, 56160, 56304, 56448, 56592, 56736, 56880, 57024, 57168, 57312, 57456, 57600, 57744, 57888, 58032, 58176, 58320, 58464, 58608, 58752, 58896, 59040, 59184, 59328, 59472, 59616, 59760, 59904, 60048, 60192, 60336, 60480, 60624, 60768, 60912, 61056, 61200, 61344, 61488, 61632, 61776, 61920, 62064, 62208, 62352, 62496, 62640, 62784, 62928, 63072, 63216, 63360, 63504, 63648, 63792, 63936, 64080, 64224, 64368, 64512, 64656, 64800, 64944, 65088, 65232, 65376, 65520, 65664, 65808, 65952, 66096, 66240, 66384, 66528, 66672, 66816, 66960, 67104, 67248, 67392, 67536, 67680, 67824, 67968, 68112, 68256, 68400, 68544, 68688, 68832, 68976, 69120, 69264, 69408, 69552, 69696, 69840, 69984, 70128, 70272, 70416, 70560, 70704, 70848, 70992, 71136, 71280, 71424, 71568, 71712, 71856, 72000, 72144, 72288, 72432, 72576, 72720, 72864, 73008, 73152, 73296, 73440, 73584, 73728, 73872, 74016, 74160, 74304, 74448, 74592, 7

This is how the infamous Golden State Killer was caught, although GEDmatch, the specific company that provided the data, has stated that it will no longer cooperate with law enforcement without a warrant. While taking care to follow any additional instructions provided, simply take a swab of your saliva, put it in a tube, mix it with a solution that stabilizes the DNA in your saliva and return it to AncestryDNA in the included prepaid envelope. Federal authorities and other law enforcement agencies have used DNA from testing services in past investigations.How You Can Protect Your DataIt's worth noting that if you use AncestryDNA or one of the other large DNA testing companies, your data has a much greater chance of remaining safe than if you use a smaller company. Checking the MSDS after exposure to chemicals helps first responders make sure the proper first aid measures are applied.Environmental Cleanup AgenciesMSDSs are also used after a chemical spill for the purpose of cleaning the exposed area and reducing the environmental impact. AncestryDNA also does not comply with information requests from law enforcement unless forced to do so by a warrant or other valid legal process, and it advocates for customer privacy in the event that it is made to turn over any data to law enforcement. Photo Courtesy: Ancestry/YouTube Federal law protects your DNA as well if you live in the United States. While you will lose access to your information, no one else will be able to see it, either. While drivers aren't typically responsible for handling the hazardous materials the same way workers in a facility such as a factory are, they may still come into contact with the chemicals.First Responders and MSDSsIf someone is injured by hazardous materials on the job, the first responder who administers first aid needs to understand what he or she is dealing with in order to offer proper care. Hazardous materials must have accompanying MSDS sheets for workers, management, transporters and safety personnel to use to stay safe.Protecting Workers' HealthOne important purpose of an MSDS is to protect the health of workers who have to use chemicals and potentially hazardous items on the job. The Genetic Information Nondiscrimination Act (GINA) statute makes it illegal for most employers or health insurance providers to acquire DNA data for the purposes of discrimination.The Risks of Submitting Your DNAWhile Ancestry DNA strives to keep your DNA and the data that it contains secure, there are risks that you take when you submit your DNA for analysis. You can also revoke access for companies and nonprofit organizations to use your DNA anonymously, although any companies that already accessed it will still have that information. You can turn off the ability for other people to see if your DNA is close enough to theirs for you to be related. Companies maintain MSDSs that the workers must be permitted to read, according to the Occupational Safety and Health Administration, or OSHA. When signing up for AncestryDNA, you're also given the option to anonymously share your DAN with various universities and companies for research purposes. Regardless of which company you choose, however, there are still measures you can take to protect your data. An MSDS offers information about first aid tasks such as rinsing eyes with water or keeping water away from the affected area, depending on the material involved. AncestryDNA breaks down your DNA sample into a thousand of what they call "windows." Each "window" looks at over 700,000 fragments of your DNA. AncestryDNA is constantly refining its methodology, so you may receive updates to your DNA information from time to time.AncestryDNA has a detailed statement of how it protects your privacy on its website, and it takes specific measures to protect the DNA samples that you and other customers submit. The sheets also tell workers what to do in the event of a spill or accidental exposure to hazardous materials.Managers use MSDSs to determine what types of PPE workers must have available when working with a specific hazardous chemical or product. However, if relatives share their DNA (on Ancestry.com or elsewhere) and their data somehow falls into the hands of law enforcement or another organization, they would hypothetically be able to identify if you are a relative of that person if they also have a sample of your DNA. How do scientists determine your ethnicity from a sample that came from inside your mouth? These DNA tests are fun and informative, but have you ever thought about what companies like Ancestry do with your DNA? The laboratories that perform your DNA analysis do not have your personal information when they test your DNA sample. It stores your DNA data in a protected database with multiple layers of security, and your physical DNA sample remains in a facility with limited access and 24-hour security. Here's a look at how these tests work and what happens to your data when you submit your DNA for a test. The biggest key to keeping your DNA data secure is reading the privacy policy thoroughly and only agreeing to uses you approve of — and not signing up if that isn't possible. How Do You Take a DNA Test? The information provided on an MSDS lets environmental control agencies know how severe the risk is from the spill, and the sheets can help those organizations determine what to do to clean up the spilled chemical safely. MORE FROM QUESTIONSANSWERED.NET GINA excludes members of the military, federal employees, veterans and beneficiaries of the Indian Health Service, though internal policies for those organizations offer some protections. They do take steps to ensure that your data is safe, but there are risks to submitting your information to any company. Material safety data sheets (MSDS) list potential hazards associated with chemicals and other products, and they tell users and safety personnel how to work safely around those items. This can affect the purchasing department, because supplies must be ordered and on hand before workers use the item. MORE FROM QUESTIONSANSWERED.NET Photo Courtesy: Ancestry/YouTube What Does AncestryDNA Do With My Data? Photo Courtesy: Ancestry/YouTube The scientists at AncestryDNA compare the code in your DNA "windows" to historical samples and public databases of DNA from different groups of people all around the globe. To collect your DNA, AncestryDNA sends customers a kit that includes a plastic tube. If your DNA matches certain fragments of DNA that are known to be unique to a given group of people, then some of your ancestors were probably members of that group. Like any company, Ancestry DNA could hypothetically have its data hacked and compromised. Photo Courtesy: Ancestry/YouTube The law doesn't always protect your DNA. The MSDS tells workers what risks are associated with the chemicals and outlines how workers can protect themselves with personal protective equipment, or PPE. In a few weeks, AncestryDNA emails you the results of your DNA analysis.How DNA Tests WorkSo what happens to your DNA when you submit the test? Most people tend to opt-in. You can also report a company to the Federal Trade Commission if they violate the terms of its privacy policy. Photo Courtesy: Ancestry/YouTube Don't forget that you have the right to delete your data from Ancestry DNA at any time. AncestryDNA says that they keep your identity protected and store your data in a secure location. It impacts the way job trainers show workers how to perform tasks, and it ensures managers understand the severity of a situation in the event of a spill or a worker coming into contact with the dangerous material when not wearing the proper protective gear.The Role of MSDSs in TransportationCouriers and over-the-road drivers need to have access to MSDSs in case the chemicals spill in transit and need to be cleaned up or the vehicle is involved in an accident. DNA tests are an increasingly popular way for people to learn about their genealogy and family history, and AncestryDNA is one of the most popular, with over 14 million test kits sold since 2012.
