Beat saber custom platforms not working

How to get custom platforms in beat saber. Are beat saber custom songs illegal. Beat saber custom sabers not working.

Co-Edited by Yuuki#0802 These platforms are not the custom estios! This is © platform you are on © play! keep this in mind Click here to go back to the main guide Useful Links Unity 2018.3.10f1 (any bottom or top and BeatSaber will crash) This drive project. Source: here Program template of your choice (I prefer fusion360)

UnityAssetBundleExtractor (UABE) NOT my program, be careful when downloading programs from the internet! Source: here The Platform tab files.zip contains© a .stl PlatformTemplate. .obj PlatformTemplate and a configured BMBFmod.json Making your own template Make your own template should be simple! just import the template I have provided in the platform tab file.zip and work around it! You will have to create a PlayersPlaceCore (the dark part of the platform) and a PlayersPlaceFrame (The bright edge of the regular platform) I created a platform with my own name on it so I can show how it looks: My PlayersPlaceCore: MyPlayersPlaceFrame: Overlapped with the platform guide: (A© very large, but for the sake of this Guide I rolled with it) Export your knits as .obj, or if you're © like me and use fusion360 or another program that can't export as .obj, you can use to convert your meshes to .obj. Be sure to select .obj in meshconvert.com! Raw Unity Mesh Files Now that you have your templates © time to convert them into Unity raw mesh files. To get started, drag your PlayersPlaceCore.obj and PlayersPlaceFrame.obj to the drive asset window at the bottom: And drag the features meshes into your scene: Now you need to build the scene, press Ctrl+ Shift + B and have windows mac Linux selected, and press build. Let it build into a folder for you recognized (For me that is © compiled in my CustomAssets folder) Now you will have to the gross meshes if the sharedassets0.assets, you will find sharedassets0.assets in your Data folder OMI etse odnatide raunitnoc euq od gnp.rirboc arap apac ad megami a raemon sanepa lic;Áf siam ©A - ."gnp.apac" . Connect your mission to your pair Sidequest open for the guide "Archives" for the Oculus folder -> Screenshots Export to your platform folder (don't forget to convert to .png!) If you recorded a video, export the video For a location on your PC, open the video and find a good place to take a screenshot. Save screenshot in your platform folder Now that you have your BMBFMOD, JSON configured for use, you can put them in the same folder as your playersplacecore. dat and playersplaceframe. dat and close them. Do not use a .rar file, it has to be zip! This complete platform can now be loaded into the game! Here's what mine looked like: (As I said, it's too big, but this image shows how big it is: P) Add your platforms to repo I can also support adding your platform to the repository here! (Adjusted explanation of @ Yuuki # 0802 of BSMG, and so I mean mostly shamelessly copied) Make a Github account if you still don't click the "Fork" button in the top right corner of this repository, do your fork. repo (so your name / bmbfcustomabers) and click on "Clone or download", copy this link Go to Github Desktop: Archive -> Clone Repository -> URL and paste the link and then click the clone (keep the local path note you put REPO IN) Head where youo repo in your Explorer file (C:\ User \ Github \ BMBFCustomsAbers) Go to the "Platforms" folder. Create a new one For your sabers (eg Labandit915 platforms ") Drag your zip file in this folder range Back to the github work area Add a summary to your Commit at the bottom left (eg) Added {PlatformName} by labandit915 ") Press Commit Press PUSH GO back to your bifurcated repo and press" Create trace request "and send! Once I or Yuuki accepts your trace request, your platform will be added here! Please test your mods before sending. Make sure they correct the JSON formatting and appear correctly on the Mod BMBF screen. Page 2 You can not perform this action at this time. You came in with another guide or window. Recharge to update your session. You signed up for another guide or window. Recharge to update your session. session.
