Gcam (google camera) apk download for redmi note 8. Best google camera for redmi note 8. Google camera for redmi note 8 pro apk download.

Xiaomi launched the Redmi Note 8 Pro phone in September 2019. It comes with MediaTek Helio G90T SoC, Android 9.0 Pie through MIUI 10, up to 8GB of RAM and 128GB of internal storage, etc. The main feature of this device is the 64 megapixel rear camera. It has quad rear cameras with 64 MP (f/1.9) wide angle lens, 8 MP (f/2.2) ultra wide angle lens, 2 MP (f/2.4) dedicated macro camera, 2 MP (f/2.4)). 2.4) Depth Sensor. On the front is a 20-megapixel selfie camera with an f/2.0 lens. While the Redmi Note 8 Pro's camera offers PDAF, HDR, Panorama, Gyro-EIS and more, the default MIUI camera app doesn't deliver much better picture results. If you are a Redmi Note 8 Pro user and you are not satisfied with the camera results, you can easily use the Google Camera port. Check out the instructions to install Google Camera APK port on Redmi Note 8 Pro (Gcam). Google Camera for Redmi Note 8 Pro Google Camera is a very popular and widely used camera app for Android smartphones at the moment. It offers powerful software integration and optimization, bringing you stunning images and videos. The night viewfinder, portrait shooting, autofocus, edge detection, lens blur are all excellent. The Redmi Note 8 Pro's quad camera shows its true strength when using the GCam app. The app ported to Google Camera offers Portrait mode, Google Lens, Lens Blur, Enhanced HDR+, PhotoSphere, RAW image file support, etc. Thank you for porting the GCam APK to Redmi Note 8 Pro. Note. There is no Night Sight for Redmi Note 8 Pro in this version of Google Camera. Download Link: MGC_6.1.021_xcam6_RN8P_Wyroczen_TEST3.apk Steps to Install Google Camera APK Port on Redmi Note 8 Pro First, you need to download the GCam APK file on your device. On your device, go to Settings > Security or Privacy > turn on Unknown Sources. Tap the downloaded GCam APK file and then tap the "Install" button. The application will be installed on your phone. Now follow settings for working with the ported GCam application for Redmi Note 8 Pro. Recommended settings: Open GCam app -> launch "Settings" > select "Advanced". Click Edit -> RAW format -> select RAW_sensor. Set the quality of the resulting JPG to 100%. That's all. Enjoy Google Camera. We hope you found this guide useful. Feel free to ask any questions in the comments below. Quick Links Google Camera and its post-processing algorithms have arguably changed the game for what we expect from smartphone cameras, elevating the Google Pixels to some of the best Android phones you can buy for a camera. This is why Google Camera ports are in such demand for non-Google devices. With the appropriate ported Google Camera app, you can take advantage of Google's excellent HDR+ optimization, as well as their portrait mode, on almost any smartphone that supports the Camera2API. How to Install and Use Google Camera Port Make sure your device supports the Camera2 API. Here's our guide on how to check if your Android device supports the Camera2 API. In addition to the Camera2 API, Google Play Services is also required to make Google Camera work. The app crashes if you try to run it on a phone without Google Apps. However, you can use the MicroG or Gcam provider to mock Google's proprietary libraries. Download the most compatible Google Camera Transfer APK file from this section and install it. Use one of the recommended device versions or choose one of the universal modifications. Additional XML configuration files may need to be installed. Restart the application. Good luck! This article lists devices from various OEMs that have at least one working Google Camera port. We tried to find the most stable and user-supported versions. There may be "better" versions available, but the ports listed here should work for most people. If you think a device is missing or the link needs to be updated, please let us know in the comments section. Please note that the following devices are sorted for her name. Some of the linked threads may not be from the correct device forum. This is not a bug because multiple ports work on multiple devices. We just linked to a thread where you can download the APK as well as the config files. Device Serial Number Device Forums Code Name Google Camera Ports Known Google Camera Ports Discussion Thread 1 Fairphone 4 (fp4) - Click Here Device Serial Number Device Forums Code Name Google Camera Ports Known) Google Camera Port Discussion Thread 1 TCL 10 Pro - Click Here Choose the right APK for your device, change the appropriate settings and take great photos with the magic of Google! If you have a Xiaomi Redmi Note 8 2021, you can now download and install the latest working port of Google Camera (GCam). Google Camera (GCam 8.1) was created by developers like Arnova8G2 and BSG. The latest Google camera port for Redmi Note 8 2021 is GCam 8.1. Google has released this version for Android 11 and now you can install it on Redmi Note 8 2021. Google Camera 8.1 for Redmi Note 8 2021 comes with various features including Cinematic Panning, Night Portrait Mode, Quick Zoom and Enhanced Super Res . zoom. All the features of GCam 7.4 and GCam 7.3 are retained, such as night vision, astrophotography mode and HDR + advanced. Below you can download all GCam files that work on Xiaomi Redmi Note 8 2021. According to the developers, the apps should run on Android 10 and Android 11. Download Google Camera (GCam 8.1 APK) for Xiaomi Redmi Note 8 2021 has two apps job options. One belongs to Arnova8G2 and the other variant belongs to BSG. Both developers updated their GCam mods with Google Camera 8.1 base and should work well with Redmi Note 8 2021. BSG GCam 8.1 APK for Xiaomi Redmi 8.1 2021: Download BSG GCam 8.1 APK Arnova8G2 GCam 8.1 APK for Xiaomi Download2 : Redmi21 APK. guide Arnova8G2 GCam 8.1 APKGoogle Camera GCam 8.1 on Xiaomi Redmi Note 8 2021 As mentioned above, there are many Google Camera options for Redmi Note 8 2021. Both options work quite well, but one may be better than the other. The only way to know which one works best for your phone is to install and try both. Download the APK file of the Camera app from the links above and transfer them to your phone's internal storage. Take your phone and go to the file manager and navigate to the folder where you moved the APK file. Click on the file to install it. If the installation process does not start, the phone will ask you to allow unknown sources. Just click Allow. Click "Install" again and the app will be installed shortly. Once your phone shows that the app was successfully installed, go to the app drawer and click on Google Camera to launch it. If the application does not open or closes forcefully, go to "Settings" -> "Applications" and find Google Camera. Clear data and cache and try again. How to use Google Camera on Xiaomi Redmi Note 8 2021 First of all, make sure you have properly installed the app on your phone and that it does not crash. Go to the app drawer and tap on the Google camera icon. If the app opens and the camera shows a working viewfinder, you have a good working version of the app installed. Now you can use night finders, astrophotography and more. To enable these options, open Camera, go to Settings, and click Advanced. There you have the option to activate night vision and astrophotography. Here you will find the latest Google Camera APKs for all Xiaomi and Redmi (Gcam) devices. Xiaomi has a wide range of smartphones including Xiaomi, Black Shark, Redmi, Poco, Mi-A, etc. From cheap entry-level devices to budget devices, from mid-range to flagships. The Chinese smartphone brand has conquered the global user base and competes fiercely with its competitors. However, 2019 will be the year of some in the mobile market such as dark mode, powerful cameras, Android 10, night mode and more. While Xiaomi devices are quite powerful and fully equipped with higher resolution and more cameras, they still can't beat the Pixel cameras. If you believe this and you are using a Xiaomi or Redmi device, you can download Google Camera APK for Xiaomi and Redmi devices (Gcam). Why do you need Google Camera app for Xiaomi and Redmi devices? Google Camera is the best camera app for Google Pixel devices that has powerful AI software coding and the image output is stunning than any other camera app. Although there are some budget flagships from Xiaomi that can deliver great low-light shots, but not quite. Because Xiaomi and Redmi budget segment devices also have cameras with so-called higher resolution, but the actual image quality seems to be so bad and not so clear. Update: [Gcam Mod] Download Google Camera 8.1 APK For All Android Devices. So if you are a Xiaomi or Redmi device user and you love mobile photography and are looking for the best third party camera app, this article is for you. Here we have shared all the compatible GCam download links that can work well on your Xiaomi device. Since most of the Xiaomi devices have Qualcomm Snapdragon processor, the developer support is good enough. Thanks to GCam developers Arnova, BSG, san1ty and others for the great selection of Google Camera ports for Xiaomi and Redmi devices. [su_highlight background=–â#78ffb1â³ color=–â#16181bâ]Update: Download GCam 7.3 (Backloaded) APK from Pixel 4 [Google Camera for All Android Phones] [/su_highlight] APK for Xiaomi and Redmi (Gcam) If your Xiaomi device running Android 9.0 Pie or later, your device already has the Camera2 API enabled by default. Therefore, most users of Xiaomi devices do not need to do anything else. Just download GCam APK file according to your device model below and install it. Ported to Google Camera, the app includes Night Mode, Portrait Mode, Lens Blur, Video Stabilization, Time Lapse, Photosphere, Playground (AR Stickers), RAW support, enhanced HDR+, Panorama, Google Lens and more.
