

Continue

Auto chess is a newer genre and gaining steam quickly. It saw mass success on PC with games like Dota Auto Chess, Teamfight Tactics, and others. The premise of these games is fairly simple. You place characters on the board each round and those characters do battle with the enemy characters. The characters do battle on their own without any further input from you. That's why they call it auto chess or auto battling. If you win, the enemy takes damage and if you lose, you take damage. The various characters work together with synergistic abilities to give you an edge in battle. Each game has its own variation of this core mechanic, but they all function in the same way. It's a budding genre on mobile so we'll keep an eye out for new entrants. Feel more than free to leave some ideas in the comments as well. The best auto chess games and auto battle games for Android Arena Alistars is a fairly decent auto battler. Players have access to a bunch of different maps, characters, and various game modes. It boasts matches with up to seven players along with a co-op mode if you want to play with friends or strangers. It also has a campaign, a practice mode, tournaments, and nice little things like emotes. The game seems to tick all of the boxes and most players seem happy enough. Most of the complaints either deal with connectivity issues or minor bugs with AI opponents not taking the damage they should. We assume these are all temporary issues, though. The game is free to play with an optional battle pass if you want to unlock premium content. See also: The best MOBAs and Arena Battle games for Android Arena of Evolution: Red Tides is another auto chess game that seems to hit most of the right notes. It has over 50 pieces to collect and use for your team. Additionally, players get eight-player free-for-all PvP, and fairly standard auto chess mechanics. The game also lets you send and receive heroes to other players and features global servers for better or for worse. A lot of the game's complaints come from Internet connectivity issues. However, aside from that, the experience is solid all around. The developers also intend on adding cross-play between PC and mobile in a future update so check back for that if it interests you. Auto Chess by Dragonest Games has a lame name, but it's actually a solid game. It was among the first wave of auto chess games on mobile. It features seven-player free-for-all battles, an esports league, and, if you do well in the esports league, actual cash prizes. Thankfully, the game is actually quite easy to learn with one of the friendlier UIs we've seen in an auto chess game. We feel like this one is great for beginners to the genre and the difficulty only scales up from there as you face more and more competent opponents. Its biggest flaw is the finicky cloud saving feature. Be extra careful if you intend to uninstall and reinstall or buy a new phone because a lot of people have lost their saved data. See also: The best chess games for Android Badland Brawl is probably the simplest auto battler on the list. It uses a 2D, side-scroller map versus the traditional chessboard style setup. Thus, this is an excellent game for beginners to the genre even if the premise is still the same. You drop characters onto the board and they do battle with your opponent's characters. The winner is the last one standing. It has a bit of a gacha element but it's nothing too serious. Additionally, you can watch other people play the game if you don't feel like it. We may catch some flak for this pick, but we think it's a good starter auto battler for folks new to the genre. See also: The best fighting games for Android Chess Rush is another decent auto battler with all of the common core elements. You place characters, they synergize, and you beat your opponents if you outwit them. The game has over 50 characters along with various game modes, including two versus two, four versus four, and eight-player free for all. It also includes a Turbo Mode with matches that last about ten minutes. It hits almost all of the right marks and that makes sense. This is a Tencent game, developers of Arena of Valor and PUBG Mobile. Aside from some connectivity issues, most people seem to enjoy the game and it's nice to see bigger mobile game developers in the genre. Clash Royale is the mainstream option for an auto battler. It has most of the same elements as other games in the genre. You play characters on a board, they attack the other player, and the last one standing wins. This one is quite a bit different in execution, though, and has many gameplay elements from Supercell's other hit game, Clash of Clans. Additionally, the game is a 1v1 duel where most auto chess games have larger free for all modes. We would understand if you don't consider this a pure auto battler experience, but it fulfills all of the qualifications, even if it's a bit closer to a deck-building game. Dota Underlords is the most recognizable name in auto chess. The whole genre originated from a Dota 2 mod. The genre took off from there and Dota Underlords is the mobile version of the mod. It is your standard auto chess game so you should know how it works by now. You get heroes, you place them down, make synergies, and try to beat your opponents. Plus, the game includes an offline mode. It had a character rotation, but instead, now it has cross-play with Steam, a very reasonable trade-off. It's also the only totally free auto chess game on the list. It's not perfect, but it's solid. Hearthstone is another game that may not fit here exactly, but it's still an auto-battler and it belongs on a list like this. It's one of the most famous deck-building auto-battlers on any platform and most people know how it works. You build a deck, start a duel, put down your cards, and do battle. The last person standing wins. The game includes a few different game modes, cross-platform play with PC, and it's a fairly mature game. However, CoB Mobile's BR mode is one of the best Android games like PUBG mobile. Translating CoD's sweet, frantic combat into the battle royale format results in an amazing BR experience. In fact, in our opinion, it's even better than PUBG. CoD Mobile Battle Royale doesn't have the same plodding pace as PlayerUnknown's. Instead, you'll find yourself sprinting through interiors, gunning down enemies with the same classic combat loop you're used to. That doesn't mean there aren't tense moments like in PUBG. With body armour mechanics, you can still have the same terrifying, strategic combat as before, now it's just satisfying. If you've yet to play CoD Mobile, check it out here. The best part is: if you don't like the game's Battle Royale, there's a host of other multiplayer options to try. Rules of Survival If you're looking for a mobile battle royale game that looks almost exactly like PUBG, Rules of Survival is for you. As far as best Android games like PUBG go, this is the closest you'll get to just another PUBG game. Well, except New State. Rules of Survival is absolutely more about quantities, not quality. While the battle Royale game is rough around the edges, you'll be able to experience huge. In this PUBG competitor, you'll be able to take part in gigantic matches consisting of 300 players. Previously, you were only able to play in 120 player matches. However, a recent overhaul increased the player count. The issue with Rules of Survival is that it's not the best PUBG competitor, it's just a solid clone. Furthermore, its huge player numbers aren't exactly balanced for its maps. It's still a lot of fun though! If you wish to try it out, download it here! Apex Legends Mobile Another first-person title, Apex Legends Mobile is a fantastic portable version of the console and PC shooter. Ported by Respawn Entertainment, this mobile conversion is a brilliant battle royale title. In this BR, you'll pick a Legend with their own look and special abilities to take into the battlefield. Working on your own or as a team, you'll have to work hard to be the only remaining Legend (or squad) on the map. As far as mobile battle royales go, this is one of the best options available. However, it is a console game first and foremost, and some of the game's mechanics aren't as well suited to touch as, say, CoD Mobile. Nevertheless, this is one of the most polished battle royales you can get on Android. If you're struggling to find the best Android games like PUBG, you should look at Apex Legends Mobile. Are you interested? If so, download the game right here. Knives Out Created by the same developers as Rules of Survival, Knives Out is another battle royale game that's a bit too similar to PUBG. In fact, it's somehow more of a copy than Rules of Survival is. Unlike its sibling, Knives Out sticks to 100-player matches. It's essentially just a clunkier PUBG, and at that point you may as well just play that game. On the other hand, if you're simply just looking to experience a different battle royale, this is different! It's just not the most engaging version of the genre. If you still want to give it a shot, you can download the game here! Garena Free Fire Originally a PUBG clone, Garena Free Fire was a smaller game that consisted of just 50-person matches. Back then, it was still predominantly a shooter battle royale. However, over the years, the game has evolved into a different beast. Garena is not one of the best Android games like PUBG, but it is interesting. It's a lot more frenetic and quirky than PUBG's overly corporate appearance. On the other hand, it's still rough around the edges. Despite being around for five years, Garena is still incredibly unpolished. While bugs don't usually get in the way, you'll find them more than expected here. Maybe you love bugs! If so, this is for you! (Pst, that's a download hyperlink!) There you have it, the best Android games like PUBG Well, that's pretty much it! These are all of the Android games like PUBG that offer a similar vibe. While games like Fortnite are also Battle Royale titles, they focus more on, say, building, bases and obstacles. If we missed any that you particularly enjoy, tell us about them in the comments! We're always looking for new games to talk about. Knives Out Player Unknown's Battlegrounds PUBG PUBG Mobile
