Logical and analytical reasoning pdf

Logical and analytical reasoning topics. Logical and analytical reasoning for b.ed entrance. Logical and analytical reasoning questions for class 6. Logical and analytical reasoning questions for class 5. Logical and analytical reasoning pdf. Logical and analytical reasoning questions for class 8 pdf. Logical and analytical reasoning syllabus.

Every penny brought this book last week. in my opinion book no © Hand quality of pg © low, but general excersise and explanation given © very goodread Moresuvankar Malikcertified Buyer, Burdwanjan, 205must Buy! Wow. © Very lateread Moresravanthi Reddy Manthenacertified Purchaser, Ghanpur Warangal DistriritionalAPR, 20195worth All Pennyvery Good Book I really like it. Best book for CompetitiveEad Moresangeeta Kumari Nagari certified Buyer, Damanjo Dijun, 20184nice product The product with timely delivery to the restorative buyer, New Delhidec, 20183do The JobGood Book with good content go to ITTI'to read Moreflipkart Purchaser CustomercertierRertified, Dhanbad4Months Ago St. Super! Flipkart Customercertified Buyersep Purchaser, Satara Districtsep, 20204Good Quality ProductValuable ProductRead Moreflipkart Customercertified Buyersep, 205AwadesomeHemanta Palcertified Purchaser, Singurnov, 20195brilliantPratkshya Mishracer Tified Purchaser, Balewarshoct, 20195worth Every Pennyflipkart customer. Controlled buyer, Patnaoct, 2019 In this section you can learn and practice non-verbal reasoning issues based on "analog reasoning" and improve your skills to face the interview, competitive examination and test rounds (cat, gate, tread, treadmill, bank examination, rail examination, etc.) With total confidence. Where can I get non-verbal reasoning analogue questions and answers with explanation? Indiabix provides many non-verbal reasons (analog reasoning) and answers with explanation. Examples solved with detailed description o f the answer, explanation and it would be easy to understand. All students, the frescos can download analog questions of non-verbal reasoning with answers such as PDF files and eBooks. Where can I get non-verbal reasoning analogue reasoning questions and answers (objective type, final choice)? Here you can Verbal Type Analog Reason Questions and answers for interrogation and entrance examination. Also © I have just presented a few genuine or false questions. How to solve Anal Reason problems Not Verbal? You can easily solve all types of Verbal Reason issues based on Anathematic Reason, practicing the objective type exercises given below, as well © m get mom © Shortcut all to solve Verbal Reason problems Analyse Reason. Exercise: Analogous reasoning 1Anarchic reasoning uda 160; Find the number of triangles in the given figure. Answer: Option D Explanation: The figure can be labelled as shown. The simplest triangle are AHG, AIG, CBI, JFE, CJE and CED e, 6 i n numbers. The triangle comprising two components are ABG, CFE, ACJ and EGI i.e. 4 i n numbers. The three-dimensional compounds of three components are: ACE, AGE and CFD i.e. 3 i n numbers. There is only one triangle (AHE) composed of four components. Therefore, there are six +4 + 3+ 1= 14 triangles in the given figure. See Response Discuss in Forum Workspace Report 2. It's Rayna160; Find the number of straight lines required to make the given figure. Answer: Option B Explain: The figure can be labeled as shown. Horizontal lines are IK, AB, HG and DC i.e. 4 i n numbers. Vertical lines are AD, EH, JM, FG and BC i.e. 5 i n numbers. The inclined lines are IE, JE, JF, KF, DE, DH, FC and GC i.e. 8 to © the number. Thus, there are four +5 +8= 17 straight lines in the figure. See Response Discuss in Forum Workspace Report 3. uda 160; Find the number of triangles in the given figure. Answer: Option D Explanation: The figure can be labelled as shown. The simplest triangle are AGH, GFO, LFO, DJK, EKP, PEL and IMN i.e. 7 i n numbers. The triangle with two components each of them are GFL, KEL, AMO, NDP, BHN, CMJ, NEJ and HFM i.e. 8 i n number. The triangle with three components each of them are IFP, BIF and CIC i.e. 4 i n numbers. Nummer. Triäms that have four components are ANE and DMF I.E. 2 in number. The triäms that have five components are FCK, BGG and ADL I.E. 3 in number. The triäms that have six components are BPF, COE, DHF and AJE I.E. 4 in number. Total number of triäms in figure = 7 + 8 + 4 + 2 + 3 + 4 = 28. Page 2 Exercise :: Analytic Raciocanium - Section 1Analytical Raciocanium - Section 2 6. Find the minimum number of straight lines needed to make figure given. Answer: Option an explanation: The figure can be labeled as shown. The horizontal lines are IJ, AB, EF, MN, HG, DC and LK I.E. 7 in number. The vertical lines are ad, EH, IL, FG, BC and JK I.E.6 in number. Thus, there are 7 + 6 = 13 straight lines in the figure. View reply Discuss in the relation of the work space of the FichoRum 7. Find the number of triäms in the given figure. Answer: Option C Explain: The figure can be labeled as shown. The simplest triangles are AFJ, FJK, FKB, BKG, JKG, JGC, HJC, HJ, DIH, DEI, EIJ and AEJ I.E. 12 in Number. The two-compound controllers are JFB, FBG, BJG, JFG, DEJ, EIJ, DJH and DEH I.E. 8 in number. The triäms composed of three components are AJB, JBC, DJC and ADJ I.E. 4 in number. The triäms composed of six components are DAB, ABC, BCD and ADC I.E. 4 in number. So, there are 12 + 8 + 4 + 4 = 28 tribes in the figure. View reply Discuss in Forum Workspace Relative Page 3 Exercise :: Analytic Raciocanium - Section 1Analytical Raciocínio - Section 1Analytical Reason 2 11. Find the number of triäms in the given figure. Answer: Option D Explanation: The figure can be labeled as shown. The simplest triängulos are ABL, BCD, DEF, FGP, PGH, QI, JOI, KRJ and LRK I.E. 9 in number. The triäms composed of two components are OSG, SQO, SPI, SRI, KSQ, KMS, FGH, JHI and JKL I.E. 9 in number. There is only a triägle I.E. KSG that is composed of four components. The triäms composed of five each are NEI, ANI, MCG and KCO i.e. 4 in number. The trigulums composed of six components each are GMK and KOG, i.e. 2 in number. There is only one triangle, i.e. AEI composed of ten components. There is only one triangle, i.e. KCG composed of eleven components. Therefore, Total number of triangles in the given figure = 9 + 9+1 + 4 + 2+1 + 1 = 27. See Answer Discuss in Forum Workspace Report 12.Ä Find the number of triangles in the given figure. Answer: Option C Explanation: The figure can be labeled as shown. The simplest triangles are ABI, BIC, AIJ, CIJ, AHJ, CDJ, JHG, JDE, GJF and EJJ i.e. 10 in number. The trigulums composed of two components each are ABC, BCJ, ACJ, BAJ, AJG, CJE and GJE i.e. 7 in number. The trigulums composed of four components each are ACG, ACE, CGE and AGE i.e. 4 in number. Total number of triangles in figure =10+ 7 + 4 = 21. See Answer Discuss in Forum Workspace Report Page 4 The figure can be tagged as shown. The simplest triangles are APQ, AEQ, QTU, QRU, BGS, BHS, RSU, SUV, TUW, UWX, NWD, WDM, UVY, UXY, JCY and YKC i.e. 16 in number. The trigulums composed of two components each are QJW, QSU, SYU and UWY i.e. 4 in number. The trigulums composed of three components are each AOU, AFU, FBV, BIU, UIC, ULC, ULD and OUD i.e. 8 in number. The trigulums composed of four components each are QYW, QSW, QSY and SYW i.e. 4 in number. The triangles composed of six components each are AUD, ABU, BUC and DUC i.e. 4 in number. The composite triangles of seven components each are QMC, ANY, EBW, PSD, COH, AGY, DSK and BJW i.e. 8 in number. The triangles composed of twelve components each are ABD, ABC, BCD and ACD i.e. 4 in number. Thus, there are 16 + 4 + 8 + 4 + 4 + 4 + 8 + 4 = 48 triangles in the figure. Page 5 The figure can be labeled as shown. The horizontal lines are DF and BC, i.e. 2 in number. The vertical lines are DG, AH and FI i.e. 3 in number. The oblique lines are AB, AC, BF and i.e. 4 in number. Thus, there are 2 + 3 + 4 = 9 straight straight Now, let's count the number of triäms in the figure. The simplest triangles are ADE, AEF, Dek, DJK, FLK, DJB, FLC, BJG and LIC I.E. 10 in Number. The triäms composed of two components are: ADF, AFK, DFK, ADK, DKB, FCK, BKH, KHC, DGB and FIC I.E. 10 in Number. The triäms composed of three components are each DFJ and DFL I.E. 2 in number. The triäms composed of four components are ABK, ACK, BFI, CDG, DFB, DFC and BKC I.E. 7 in number. The triäms composed of six components are ABH, ACH, ABF, ACD, BFC and CDB I.E.6 in number. There is only a triägle, that is, ABC composed of twelve components. There are 10 +10 + +10 +2 + + +6+ 1 = 36 tribes in the figure. Page 6 The value can be labeled as shown. The simplest triängulos are Aml, LRK, KWD, DWJ, JXI, IYC, CYH, HTG, GOB, BOF, FNE and EMA I.E. 12 in number. The triäms composed of two components each of them are AEL, KDJ, HIC and FBG I.E. 4 in number. The triäms composed of three components are APF, EQB, BQH, GVC, CVJ, IUD, DUL and KPA I.E. 8 in number. The triäms composed of six components are ASB, BSC, CSD, DSA, AKF, EBH, CGJ and IDL I.E. 8 in number. The triäms composed of twelve components are: ADB, ABC, BCD and CDA I.E. 4 in number. Total number of triäms in figure = 12 +4 +8 + 8 +8 +4 +4 = 36. Page 7 Exercise :: Analactic Reason - Section 1traäzo Analötics - Section 1,17-section 2 31. ä, Uda 160; Find the number of triäms in the indicated figure. Answer: Option C Explain: The figure can be labeled as shown. The simplest triängulus are AFB, Föb, EBC, DEC, DFE and AFD I.E. 6 in number. The triäms composed of two components are each AEB, FBC, DFC, ADE, DBE and ABD I.E.6 in number. The triäms composed of three components are each ADC and ABC I.E. 2 in number. There is only one triangle, that is, the DBC, composed of four components. Thus, there are 6 + 6 + +2 + 1 = 15 triängulos in the figure. See reply discussion in the fan Relatuary report
