It has been clear for some time that drinking wine is associated with lower mortality than drinking beer or difficult spirits. But there has been a debate about whether the health benefits of Wine are due to intrinsic properties or to the lifestyle of wine drinkers. In this Danish study, reported in the British medical journal, researchers analysed 3.5 million transactions that took place at 98 outlets of two major supermarket chains. On the basis of these transactions, customers were classified as “wine only”, “beer only”, “mixed” buyers, or “non-alcohol.” What they found was that people who bought wine also bought healthier foods than people who bought beer. Wine drinkers bought more olives, fruits, vegetables, poultry, veal, beef, milk, low-fat cheese and cooking oil, while beer drinkers bought more prepared foods, cold cuts, sausages, pork, lamb, chips, sugar butter, butter, Margarine, and soft drinks. You do not have to refrigerate all beers, but if you want them to last longer, the most cold temperatures are an option. Although the recommendations vary, the beer refrigerator that offers a range between 30 and 50 degrees Fahrenheit helps the beer last longer and maintains the flavor fresh. Beverage refrigerators allow greater control over these lower temperatures and provide constant temperatures through air compressors and circulation driven by fans. It is a good option if you tend to have large amounts of beer by hand. How can I store the beer correctly? There are some different things you should keep in mind when storing beer. Avoid natural light Natural light can cause beer from becoming a reaction between natural light and compounds present in beers. The result is a terrible flavor beer with an unpleasant odor. As we said in the previous question, getting the correct temperature of your beer is a crucial component. Beer can withstand some minor changes in temperature, but make sure not to leave it at high temperatures for long periods of time. Pay attention to the expiration of beers have different expiration dates for the limits of your storage options.What’s the difference between a refrigerator and a beverage cooler? Beverage chillers and beer fridges offer a customized storage solution for your beverages. While a refrigerator has different cooling zones for different purposes, a refrigerator has a Cooler provides a way for you to store a lot of drinks at a constant temperature. Beer refrigerators also offer other features such as temperature screens for accurate readings and close doors to keep unwanted visitors away. If you want to keep your beers fresh and ensure constant temperatures throughout the storage area, it can be a good idea to invest in a beer fridge specifically. How much electricity consumes a beer refrigerator? Many beer refrigerators are highly efficient. Some of our beer refrigerators are low power, and offers a way to store your beverages without increasing your electrical load in a significant amount.â, if you are concerned about the burden of your electrical needs, you can consult Energy requirements of beer refrigerators to help you estimate how much will add to your annual electricity bill. Do I need a beer fridge? The beer fridge can be a good idea if you tend to get a lot of beer at a time. It will free storage in your refrigerator while maintaining constant temperatures and leaves room for other things in your refrigerator compartments. You may also want a separate beer refrigerator if you feel you need to protect your content. Some beer refrigerators offer closing doors that help you control who has access to the contents of the refrigerator and could give it greater peace of storage. They are not very difficult to execute, and many offer direct operation with simple configurations and simple temperature controls. You may also want to invest in a beer refrigerator if you need to know specific temperatures quickly. With digital readings, you can keep an eye on the temperature with my minimum effort. How long is the In the fridge? Different beers have different expiration dates. Much will depend on the type of beer. Canned beer can last up to two years if properly refrigerated, giving you a great incentive to keep your beer at the right temperature. Bottled beer also lasts up to two years in the refrigerator, while both types of beer only last last nine months without refrigeration. Homemade beer will last up to two years as well, but a lot will depend on the type and method of brewing and bottling.How do you know if a beer is skunked? Skunked beer is quite easy to spot. It smells and tastes a lot of skunk spray, and you will often see the signs before opening the beer. For example, if you leave beer in the trunk for a few days in the summer, you may not even have to open it to know it’s broken.If you leave a beer in the sunlight while in a glass bottle or grunt, the light may have adverse reactions regardless of temperature. Both light and temperature can contribute to the degradation of your beer, so your storage solution is really important.How long does it take for beer to cool down in the fridge? Beer can take a long time to go from room to completely cold, especially if you want to put it at the bottom of the temperature range. It could take about nine hours for a beer to cool down enough, so be sure to plan cold beers ahead. With some refrigerators, there are turbocharged options for a temporary freezing option. This can help you start cooling your drinks, but realistically, it won’t cool your beers fast enough if you don’t have a specialized tool.How did Digital Trends choose these fridges?
