To access only individual tools, buy a subscription to Adobe Acrobat PDF Export. New and advanced functionalities are generally released on a quarterly basis. To see what's new, read what's new and changed to Acrobat Reader DC. Combine two or more files in a single PDF in the office or moving. Drag and release the thumbnails to organize the pages in the right order from the computer or from any web browser. This document provides instructions for Acrobat and Acrobat DC 2017.á, if you are using Acrobat XI, SEEA Acrobat Xi Guide. Use the Tool combine Word, Excel, PowerPoint, audio or video file, web pages or existing PDF files. Acrobat Displays the preview and arrange documents and pages before creating the file. You can delete unwanted pages and move the individual pages from a document anywhere between the pages in combination. Acrobat converts the pages of the various files into sequential pages of a single PDF. Choose Tools> Combine File. The combine file interface is displayed with the toolbar at the top. Drag files or e-mail directly into the interface of the combined files. Alternatively, choose an option from the Add File menu. You can add a file folder, a web page, any file currently open, items on the clipboard, pages from a scanner, an e-mail or a file you have previously combined (file re-use). If you add a folder that contains files other than PDFs, non-PDF files are not added. If necessary, do one of the following: In the Preview view, drag and release the file or page to position. While dragging, a blue bar moves between pages or documents to indicate the current position. Expand Pages or Collapse Document When viewing thumbnails, pass the mouse over the page or file, and then click the thumbnail expand pages. In the expanded view, you can easily move the individual pages between other pages and documents. To compress pages, pass the mouse on the first page and then click the thumbnail of the collapse. In the miniature view, the mouse over the page, then click the ZoomÀ € thumbnail. In the miniature view, pass the mouse over the page, and then click the thumbnail eliminates. In the list view, click the name of the column you want to order. Click to order in reverse order. The order of the files in the list reflects the order of the files in the combined PDF. Sort reorganizes the pages of the combined PDF. Move files up or down file list in the list view, select the file or files you want to move. Then click the Move up button up or move down. Click Options and select one of the file size options for the converted file: reduces large images to screen resolution and compresses images using low quality JPEG. This option is suitable for screen displays, e-mail and internet. Note: if any of the source files is PDF, the Smaller File Size option applies the file size function to these files. The file size reduction function is not applied if the default file size or the larger file size option is selected. Create PDFs suitable for reliable visualization and printing company documents. PDF files in the list retain their size and quality of the original file. Á. Create PDFs suitable for printing on desktop printers. Apply the high quality print conversion preset and PDF files in the list retain the size and quality of the original file. This option can In a larger file for the final PDF. In the Options dialog box, specify the conversion settings according to need, then click OK. When you have finished organizing pages, click Combina. A Status dialog box shows the progress of file conversions. Some source applications start and close automatically. Insert a PDF in another open the PDF that acts as a base of the combined file. Choose Tools> Organize the pages. The Organize Pages tool set is displayed in the secondary toolbar. In the Secondary toolbar, select Insert> from the file. Alternatively, you can right-click a page and select Insert Pages to get the insertion options. Select the PDF you want to enter and click Open. In the Insert Pages dialog box, specify where to insert the document (before or after the first or last page or a designated page). Click OK. To leave the original PDF intact as a separate file, select Save As and type a new name for the United PDF. You can also add an existing file to an open PDF. Drag the file icon directly to the page miniature panel in the navigation pane. Insert a selection of clipboard in a PDF (Windows) You can enter one or more pages of selected content copied from any application in an existing PDF. Open the document containing the content you want to add. Select the contents and then copy the selection (in most applications, choosing Edit> Copy File to the clipboard). Open the PDF that acts as a base of the combined file. Choose Tools> Organize the pages. The Organize Pages tool set is displayed in the secondary toolbar. In the Secondary toolbar, choose Insert> from the clipboard. Alternatively, you can also right-click a page and select Insert Pages to get the insertion options. In the Insert Pages dialog box, specify where to enter the selection (before or after the first or last page or a designated page). Click OK. To leave the original PDF intact as a separate file, select Save As and type a new name for the United PDF. Enter a web page or an empty page in a PDF you can enter a web page in an existing PDF by choosing Tools> Organize Pages> Insert> from the web page. In the dialog displayed, enter the URL of the page you want to add. You can also add an empty page to the PDF document from: Choice of Tools> Organize Pages> Insert> Blank Page. In the Insert Pages dialog box, specify the location where you want to add the blank page. You can also use the shortcut menu to add an empty page within the pages. Choose Tools> Organize pages to display page thumbnails. On the Miniature View page page, right-click the page where you want to insert an empty page. Select Insert Pages> An empty page. You can incorporate PDFs into other types of files that support the connection of the object and the embedding (OLE), such as InDesign® or Word files. These files are called OLE container documents. Subsequently, if you change the original PDF, the OLE functionality in the container application updates the built-in file in the container document, to reflect the changes. Choose the command of the OLE container application or insert the hyperlink command. (Windows) in Acrobat, choose Edit> Copy the file to the clipboard, then choose the Special command In the container application. application. application.
