<code>,</code>	Thousand separator	9,999	1,234

Sql format number with leading 0. T-sql format string leading 0. Oracle sql format number leading 0.

You can add leading zero in SQL to the number or string using different functions such as `to_char`. You will get something that resembles this: 00-123 [Probably not what you wanted] So `Ã ¢ ¤,~ ...` You will have to jump through some additional circles, here is an approach that will correctly form negative numbers: declares `@X float = - 1.234` declares `@width int = 20` declares `@pad char (1) = '0'` selects to `right_justified = stuff (convert (varchar (99), @x), - source string (converted from the numerical value) when @x`
